Report Integrity

Fulcrum Environmental Consulting, Inc.'s scope of service for this project was limited to those services as established in the proposal, contract, verbal direction, and/or agreement. This report is subject to applicable federal, state, and local regulations governing project-specific conditions and was performed using recognized procedures and standards of the industry. Scientific data collected in situ may document conditions that may be specific to the time and day of service, and subject to change as a result of conditions beyond Fulcrum's control or knowledge. Fulcrum makes no warranties, expressed or implied as to the accuracy or completeness of other's work included herein. Fulcrum has performed these services in accordance with generally accepted environmental science standards of care at the time of the inspection. No warranty, expressed or implied, is made.

1.0 INTRODUCTION AND SUMMARY

Fulcrum Environmental Consulting, Inc. (Fulcrum) was retained by Goodale & Barbieri Company to conduct a Phase I Environmental Site Assessment (ESA) of real property located in Spokane Valley, Washington (subject site). The subject site consists of two (2) full parcels recognized as Spokane County Tax Parcels: 35232.1509 which totals 1.24-acres and 35232.1503 which totals 0.11-acres, with the total subject site area totaling approximately 1.35-acres.

Approximate Subject Site Boundaries
Spokane Valley, Washington

The subject site is currently occupied by one single-family 1-story residential home with a basement and a detached garage. A topographic map of the site location is presented as Figure 1. An Aerial Photograph Subject Site Location Map is presented in Figure 2.

The purpose of a Phase I ESA is to assess existing and potential *Recognized Environmental Conditions* related to past uses of the subject site, and past and present activities of adjacent properties. Land use and development history are researched to identify *Recognized Environmental Conditions*. Methods used to assess the site include review of historical records and aerial photographs; interviews with people knowledgeable of the site; a detailed site survey; and review of local, state, and federal regulatory lists.

Fulcrum understands that the purpose of this Phase I ESA is to assist with environmental due diligence prior to property acquisition. For purposes of this Phase I ESA, Bob Spooner with Goodale & Barbieri Company is identified as the User.

Fulcrum has performed this Phase I ESA in conformation with the scope and limitations of ASTM Practice E1527-21 and ASTM E2247-16 for the defined subject site area. Any exceptions to, or deletions from this practice are described in Section 2.0 of this report.

Fulcrum's research into past and present activities, and current conditions of the property did not identify *any Recognized Environmental Conditions* associated with the subject site.

Fulcrum's investigation identified the following *Business Environmental Risks* associated with the subject site.

- General Debris
- Radon
- Asbestos Containing Materials
- Lead
- Lighting and Electrical Components

Fulcrum's research into past and present activities, and current conditions of the property did not identify any *De Minimis Conditions* associated with the subject site. Further details of Fulcrum's Findings and Conclusions are presented in Sections 9 through 12.

Qualifications of the personnel who completed this Phase I ESA are presented in Appendix A. User Provided Documents are presented in Appendix B. Spokane County Assessor and online research documents are presented in Appendix C. Environmental Data Resources available reports are presented in Appendix D. Subject site photographs are presented in Appendix E.

2.0 SCOPE OF WORK

Fulcrum has performed this Phase I ESA in conformance with the scope and limitations of *American Society for Testing and Materials (ASTM) International E1527-21 Standard Practice for Environmental Site Assessments, Phase 1 Environmental Site Assessment Process* and *ASTM E2247-16 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property* (Practice). The work described herein is intended for the exclusive use of the User. Third party reliance may not be appropriate and shall occur at the User's sole risk. Consistent with industry standard, information within this Phase I ESA is valid up to 180 days from the date each research and reconnaissance component was conducted, after which information herein is considered dated. Limitations and exceptions to the method are reviewed in Sections 2.4, 10.0 and 13.0 of this report. This report was prepared by, or under the direction of an Environmental Professional, defined in 40 CFR 312.10(b), as a professional with at least 5-years of relevant experience, meeting the education, training, and experience requirements, and demonstrating the technical capabilities to complete environmental investigations and Phase I ESAs. Qualifications of the personnel who completed this Phase I ESA are presented in Appendix A.

In conformance with the Practice, Fulcrum has completed the following elements:

- Visual reconnaissance of the subject property with photographic documentation of selected points of interest.
- Review and interpretation of historical aerial photographs, topographic maps, and city directories, as reasonably accessible and available.

- Review of available data for information regarding historical land use that could have involved the manufacture, generation, use, storage, and/or disposal of hazardous substances.
- Review of county, state, tribal, and federal agency lists of known or potentially hazardous waste sites and sites currently under investigation for potential environmental violations. Standard practice is to utilize Environmental Data Resources, of Shelton, Connecticut as the primary resource for agency listing.
- Inquiries of appropriate municipal, county, and state office and regulatory agencies, owners, and/or neighbors for information regarding water and sewer services, environmental violations, or incidents, and/or status of enforcement actions.

2.1 Practice-Defined Environmental Concerns

Environmental concerns are reported as a *Recognized Environmental Condition* (REC), *Controlled Recognized Environmental Condition* (CREC), *Historical Recognized Environmental Condition* (HREC), *de minimis* Environmental Condition, or *Business Environmental Risk (BER)*. The Environmental Conditions are defined by the Practice as:

Recognized Environmental Condition

A *Recognized Environmental Condition* is (1) the presence of hazardous substances or petroleum products in, on, or at the subject property; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

For purposes of this definition, "likely" is that which is neither certain nor proved but can be expected or believed by a reasonable observer based on the logic and/or experience of the environmental professional, and/or available evidence, as stated in the report to support the opinions given therein.

Controlled Recognized Environmental Condition

A *Controlled Recognized Environmental Condition* is a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations).

Identification of a *Controlled Recognized Environmental Condition* is a multi-step process that shall be reflected in the report's Findings and Opinions section(s), including the environmental professional's rationale for concluding that a finding is a *Controlled Recognized Environmental Condition:*

(1) When determining whether a recognized environmental condition has been "addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place," the environmental professional shall review reasonably ascertainable documentation, such as no further action letters (or similar certifications or approvals) issued by the applicable regulatory authority or authorities, or, in the case of self-directed actions, documentation and relevant data that satisfy risk-based criteria established by the applicable regulatory authority or authorities.

(2) In determining whether a recognized environmental condition is "subject to implementation of required controls (for example, activity and use limitations or other property use limitations)," the environmental professional shall identify the documentation providing the control(s) that addresses the recognized environmental condition in the report's Findings and Opinions section(s).

(3) When the environmental professional determines that a recognized environmental condition is "subject to implementation of required controls," this determination does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the control(s).

(4) A past release that previously qualified as a controlled recognized environmental condition may no longer constitute a controlled recognized environmental condition at the time of the Phase I Environmental Site Assessment if new conditions or information have been identified such as, among other things, a change in regulatory criteria, a change of use at the subject property, or a subsequently identified migration pathway that was not previously known or evaluated.

Historical Recognized Environmental Condition

A *Historical Recognized Environmental Condition* is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A *historical recognized environmental condition* is not a recognized environmental condition.

Identification of a *historical recognized environmental condition* is a multi-step process that shall be reflected in the report's Findings and Opinions section(s), including the environmental professional's rationale for concluding that a finding is a *historical recognized environmental condition*:

(1) When determining whether a recognized environmental condition has been "addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the regulatory authority or authorities," the environmental professional shall review reasonably ascertainable documentation and relevant data that demonstrate that unrestricted use criteria established by the applicable regulatory authority or authorities was met.

(2) A past release that qualified as a *historical recognized environmental condition* may no longer qualify as a *historical recognized environmental condition* if new conditions or information have been identified such as, among other things, a change in regulatory criteria or a subsequently identified migration pathway that was not previously known or evaluated. As noted, the report's Findings and Opinions section(s) shall include the environmental professional's rationale for concluding that a condition at the subject property is or is not currently a recognized environmental condition or a *historical recognized environmental condition*.

De minimis Environmental Condition

A *de minimis Environmental Condition* is a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a *de minimis* condition is not a recognized environmental condition nor a controlled recognized environmental condition.

Business Environmental Risk

A *business environmental risk* is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations.

Concerns that are either outside the scope of the Practice, or do not meet the practice definition of a REC, CREC, HREC, or *de minimis* Environmental Condition are identified as Business

Environmental Risks.

Business Environmental Risks are non-practice scope considerations that the User may want to take into consideration at the time of a land transaction, lease, or development planning as they may impact project cost, site management, or scheduling.

2.2 User Responsibility

Consistent with the Practice, the User was responsible for the following tasks:

- Direct a title company to prepare and deliver within 10 business days a title search report(s) and chain of ownership report prepared for the Site, including any information on environmental liens, rights-of-way, and easements; activity and use limitations; and a listing of all known former site owners and operators since 1940 or first recorded development, whichever is earlier.
- Provide all records associated with the Site and Site history, including but not limited to, information of a historical nature, such as aerial photographs, site photographs, or similar documents; contracts or legal documents regarding the Subject Site; prior Phase I ESAs or appraisals; and specialty reports prepared by others.
- Disclose all specialized knowledge, experiences, or observations related to the Subject Site, to the current or past use(s) of the Subject Site, and any potential source(s) of environmental degradation.
- Provide contact information for the current Site owner(s) and operator(s) and any previous owners or operators.
- Complete an environmental questionnaire and request that the current owner and operator complete separate questionnaires.

2.3 Significant Assumptions

No significant assumptions were made as a portion of this report.

2.4 Limitations and Exceptions

The conclusions documented in this report have been prepared for specific application to this project and have been developed in a manner consistent with the level of care and skill normally exercised by members of the environmental science profession. No warranty, expressed or implied, is made. This report is for the exclusive use of the User and their assigned representatives.

Potential remains for the presence of unknown, unidentified, or unforeseen environmental impacts associated with hidden conditions.

If new information is developed in future site work that may include excavations, borings, or other studies, re-evaluation of the conclusions of this report and amendments may be required.

2.5 Special Terms and Conditions

Fulcrum's training and expertise facilitates investigation of materials and conditions typically outside the ASTM guidelines. Included in this Phase I ESA are those factors that could pose a business environmental risk.

Considerations that are not addressed under Fulcrum's scope of work include, but are not limited to, evaluation of regulatory compliance, wetlands determination, endangered species determination, health and safety, clandestine drug manufacturing or impact, and cultural and historical resource.

2.6 User Reliance

The work described herein is intended for the exclusive use of the client. Third party reliance may not be appropriate and shall occur at the client's sole risk. Consistent with industry standard, information within this Phase I ESA is valid for up to six (6) months, after which information herein is considered dated. Limitations and exceptions to the method are reviewed in Sections 2.4 and 13.0 of this report.

3.0 DETAILED SITE DESCRIPTION

The subject site consists of two (2) full parcels recognized as Spokane County Tax Parcels 35232.1509 which totals 1.24-acres located at 228 South Carnahan Road and 35232.1503 which is 0.11-acres located at 5008 East Second Avenue, with the total subject site area totaling approximately 1.35-acres in Spokane Valley, Washington. The subject site is located in the northwest quarter of Section 23, Township 25 North, and Range 43 East. The subject site is accessed from South Carnahan Road from the East and East 2nd Avenue from the North and is located at the general following latitude and longitude:

Latitude (North): 47.6551440 - 47° 39'18.51''

Longitude (West): 117.3372000 - 117° 20' 13.92''

The Spokane County Assessor's Office gives the following information for the subject parcels:

Parcel #35232.1509: SPRAGUE ST LTS 1-4 & LTS 9-12 BLK 15

Parcel #35232.1503: SPRAGUE ST N97.5FT L5 B15

The subject site was observed to be occupied by one single-family one-story residential home, one detached one-car garage, and one shed. The subject site can be accessed from the northwest by East 2nd Avenue, from the northeast by South Carnahan Road, and the southeast by South Carnahan Road.

The Assessor indicates that the parcels are zoned as Residential. Both parcels are owned by Wheeler Investment and Development, LLC.

A general site location map is presented as Figure 1, and a detailed site map is presented as Figure 2. Spokane County Assessor's information is presented in Appendix C.

3.1 Surrounding Properties

Properties surrounding the subject site consist of:

- North – East 2nd Avenue, Single-family residential housing
- East – South Carnahan Road, Commercial Office Space
- South – East 3rd Avenue, Interstate 90
- West – Single-family residential housing

3.2 Regional Geologic Setting

From a regional perspective, the subject site lies on the eastern portion of the Columbia Plateau, an extensive, relatively featureless plain overlain by middle Tertiary basaltic lava inter-layered with sedimentary materials. The Columbia Plateau impinges upon the folded, faulted, and metamorphosed rocks of the Idaho Panhandle. The subject site lies in Spokane County, a region with warm dry summers and cool moist winters. Average annual precipitation in the Spokane area is less than 20-inches per year. The subject site is located on both Holocene age alluvium and Pleistocene age glacial flood deposits. The alluvium consists of re-worked flood deposits consisting of silts, sands, and gravels deposited in the present-day stream bed. The glacial flood deposits are a gravel dominated mixture of boulders, cobbles, pebbles, sands, and silts deposited during a series of outburst floods that resulted from repeated collapse of the ice dam that impounded ancient Glacial Lake Missoula.

The Spokane Aquifer lies below the subject site and has been designated as a sole source aquifer by the Environmental Protection Agency (EPA). Groundwater flow beneath the subject site is generally north-northwest toward the Spokane River.

3.3 Local Physical Setting

The elevation of the subject site is approximately 1943 feet (ft) above mean sea level; as identified by the Radius Report provided by Environmental Data Resources (EDR) inquiry number 7531876.2s. The 2020 topographic map provided by EDR is reported to be the most recent available topographic map. Historical topographic maps are presented with the complete EDR report as Appendix D.

3.4 Soil Type

Site soils are identified by the U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) Soil Survey Geographic (SSURGO) database data as Urban land-Opportunity.

Site soils are identified by the EDR database report as dominantly AVONVILLE, a fine gravelly-silt loam. The soil has a moderate infiltration rate with deep and moderately deep, moderately well, and well-drained soils that are moderately coarse in texture. The soil has an intermediate water holding capacity. Depth to the bedrock is estimated at greater than 60 inches.

AVONVILLE soil horizons are described to consist of the following:

- From 0 to 16 inches below ground surface (bgs) – fine gravelly – silt loam
- From 16 to 25 inches bgs – very gravelly – silt loam
- From 25 to 37 inches bgs – very gravelly – sandy loam
- From 37 to 60 inches bgs – very gravelly – sand

The USDA Soil Report is presented in Appendix B.
EDR Radius is presented in Appendix D.

3.5 Groundwater

Regional groundwater is generally found within the glaciofluvial sediments that comprise the Rathdrum Prairie-Spokane Valley Aquifer (Spokane Aquifer). The Spokane Aquifer is an unconfined aquifer formed in the coarse sand, gravel, cobbles, and boulders deposited by the Glacial Lake Missoula Floods. Due to a relatively low presence of silt and clay size particles, the aquifer is highly permeable and transmissive allowing both ready percolation of precipitation and snowmelt through the unsaturated zone and rapid lateral movement of water through the aquifer.

The aquifer has a close hydraulic relationship with the Spokane River with some sections being influent and other effluent depending on time or year and other conditions. In 1978, the aquifer was designated a sole source aquifer by the United States Environmental Protection Agency (EPA).

Groundwater flow beneath the subject site is generally north-northwest toward the Spokane River. Depth to groundwater at the subject site is estimated at greater than six feet in federal databases. Review of environmental actions and monitoring wells found no wells associated with the subject site, utilizing nearby wells it is possible to get a general understanding of groundwater levels onsite. A well approximately 850 feet west of the site at an elevation of 1,943 feet above sea level recorded groundwater at 60 feet bgs. A well approximately 715 feet east of the site at an elevation of 1,944 feet above sea level recorded groundwater at 55 feet bgs. Review of groundwater elevations from regional wells indicate groundwater at the site is expected to be at depths of 55 feet bgs or greater.

Well Log and Water Well reports for the described wells are located in Appendix C.

3.6 Wetland Assessment

While wetland assessment is a Non-ASTM Scope Consideration, Fulcrum completed a review of select mapping resources covering the subject site, including the National Wetlands Inventory (NWI), USGS topographic map, EDR Radius Map Report, and aerial photographs.

According to the NWI online map, no wetlands are located on the subject site. The closest wetland identified by the NWI online map located directly adjacent to the eastern border of the subject site running north-south and is identified as a stream, however, the adjacent stream was not identified while onsite. Historical review of the subject site does not show a known stream or intermittent stream to be located adjacent to the east boundary of the subject site.

Three small ponds were located less than one mile north of the subject site. These are manmade excavated ponds from historic gravel pit excavations.

The Spokane River is located approximately 1.5 miles north of the subject site.

Information from the NWI map was supported by onsite observations, which did not note any apparent indications of wetlands on the subject site. Observations regarding wetlands were based on secondary information and should not constitute permanent conditions of the site. Wetlands assessments were limited to the NWI database and general site observations, and do not constitute a full or comprehensive assessment. If suspect wetland conditions are noted, wetland delineation should be conducted by a qualified professional.

The site specific NWI delineation map is located in Appendix C.

3.7 Floodplain Assessment

While floodplain assessment is a non-ASTM scope consideration, Fulcrum completed a review of the Federal Emergency Management Agency (FEMA) Flood Map Service Center online. According to the FEMA online map, the subject site is identified as located within Zone X, a designation that determines the subject site to be outside the 0.2% annual chance floodplain.

The site-specific FEMA flood map is located in Appendix C.

4.0 USER PROVIDED INFORMATION

Fulcrum requested the User or their Representative to provide information about the subject site in order to assess what possible impacts previous site use may have had on current site conditions. See Appendix B for user provided information.

4.1 Reason for Performing Assessment

The purpose of this Phase I ESA is to assist with the due-diligence review as a portion of potential site acquisition.

4.2 Title Records

Fulcrum did not receive a chain of title documents from the User.

4.3 Specialized Knowledge or Experience

Fulcrum received a completed Environmental Questionnaire from Bob Spooner, the Senior Commercial and Leasing Manager for Goodale & Barbieri Company. Mr. Spooner indicated that the previous owner of the subject site is identified as Wheeler Investments and Development LLC., and that the subject site currently contains one residential house with past uses of the site being residential. Mr. Spooner indicated that the planned used for the property after acquisition is for residential development. Mr. Spooner did not state that he had any knowledge of any adverse environmental conditions associated with the subject site.

4.4 Commonly Known or Reasonably Ascertainable Knowledge

The User did not report any commonly known or reasonably ascertainable knowledge as documented in Section 8.0 of this report.

4.5 Property Valuation

Property valuation was not reviewed as a portion of the Phase I ESA. Fulcrum was not provided any evidence that the valuation of the property had been discounted or otherwise affected by any known or suspect environmental condition. Evaluation of property valuation relative to fair market value with the potential for a discount to represent a known or suspected environmental condition is the responsibility of the User.

5.0 HISTORICAL REVIEW

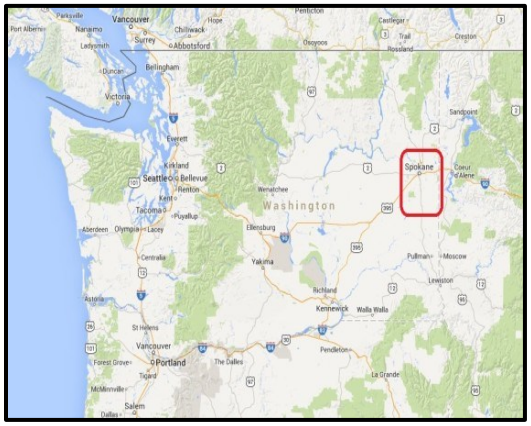

Fulcrum's research, gathered independently from information identified in Section 3.0, is presented in Section 5.0 and is generally summarized in Section 9.0 and 11.0.

5.1 Regional History

From a regional perspective, the subject site lies on the eastern portion of the Columbia Plateau, an extensive, relatively featureless plain overlain by middle Tertiary basaltic lava inter-layered with sedimentary units. The Columbia Plateau impinges upon the folded, faulted, and metamorphosed rocks of the Idaho Panhandle. The subject site lies in Spokane County, a region with warm dry summers and cool moist winters. Average annual precipitation in the Spokane area is less than 20-inches per year.

The subject site is located on the Pleistocene age Glacial Lake Missoula flood deposits. These deposits consist of thick layers of coarse-grained sediments (gravel, cobbles, and boulders) deposited during a series of outburst floods that resulted from repeated collapse of the ice dam that impounded ancient Glacial Lake Missoula.

The Spokane Aquifer underlies the subject site and has been designated a sole source aquifer by the Environmental Protection Agency (EPA).

Spokane County, Washington

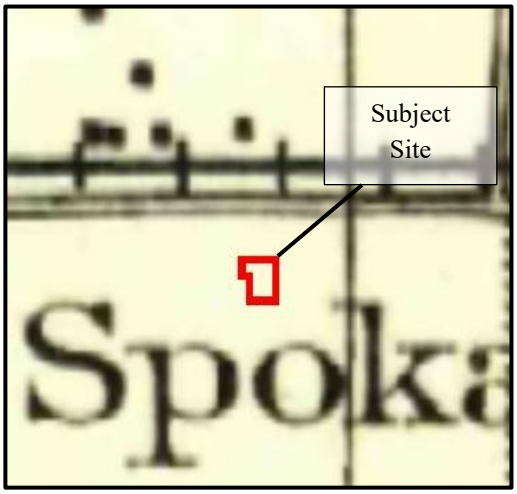

5.2 Historical Maps

5.2.1 Historical Topographic Maps

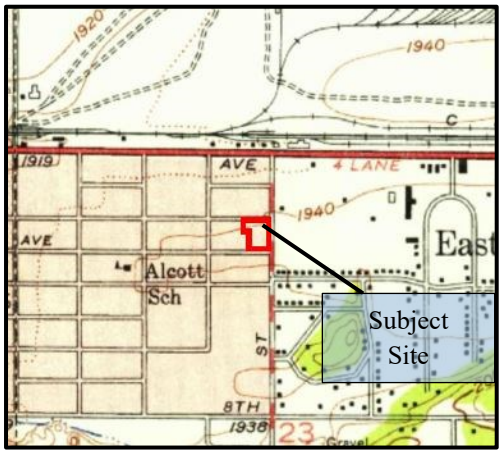

Fulcrum requested available historical topographic maps from Environmental Data Resources (EDR). Topographic maps provided by EDR, in Historical Topographic Map Report inquiry number 7531876.4, are presented in Appendix D.

The report provided topographic maps from 1901, 1911, 1950, 1963, 1973, 1978, 1986, 2014, 2017, and 2020. The 2020 topographic map is reported to be the most current topographic map available for the subject site.

The 1901 and 1911 topographic maps are centered on the subject site, are of the Spokane quadrangle and are prepared to a scale of 1:125,000. In both maps it appears that the subject site is vacant and surrounded by vacant land. Minimal development is observed on the map in all directions from the subject site with scattered structures and roads in all directions. The subject site is located in an area labaled as "East Spokane". An unidentified railroad track can be seen running adjacent to a road from east-west just north of the subject site. A second unidentified railroad track running southwest-northeast is visible further north of the site . A river disects the north portion of the map running east-west. Significant topography is shownsouth of the subject site.

1911 USGS Topographic Map, 1: 125,000

1950 USGS Topographic Map, 1: 24,000

The 1950 topographic map is centered on the subject site, is of the Spokane NE and Spokane Vicinity quadrangles and is prepared to a scale of 1:24,000. The subject site appears to be located in a residentially developed area, but no structures are observed on or adjacent to the subject site. The subject site is surrounded by roads on the north, east, and southern site boundaries. Alcott School is identified southeast of the subject site. Development can be seen surrounding the subject site in all directions.

The previously unidentified major roadway is now identified as the 4-lane roadway Sprague Avenue. The railroad track running adjacent to Sprague Avenue is still unidentified. The Northern Pacific Railroad and Northern Spokane International Railroad are identified north of the subject site running south-west-northeast and include the N P Shops associated with the railway. The Great Northern Pacific Railroad is identified to the south of the subject site running west-south. A train depot is observed to the north of the subject site. Four gravel pits are observed on the map proximal to the subject site: one to the north, one to the east, and two to the south. The NE City Boundary is identified running north-south to the east of the subject site. A reservoir is identified to the southwest of the site.

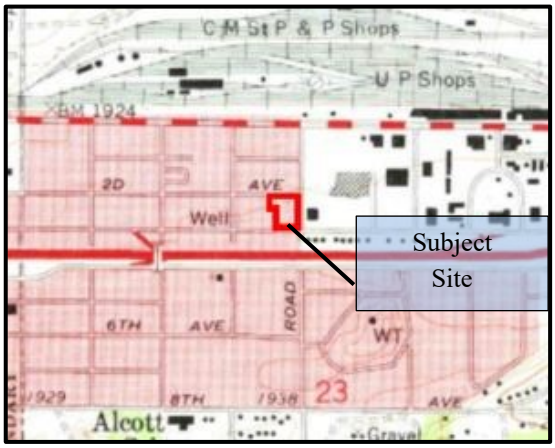

The 1963 topographic map is of the Spokane NE quadrangle and is prepared to a scale of 1: 24,000. The map is centered on the subject site. The site appears unchanged from the 1950 topographic map. Additional residential development is observed on the map in all directions from the subject site. Two large structures are presented directly east of the subject site. The previously unidentified railway running adjacent to Sprague Avenue now has an additional development labeled U P Shops. Interstate-90 six-lane roadway running west-northeast transitions into two two-lane roadways just south of the subject site. The Interstate Fairgrounds are identified north of the subject site. The previously identified gravel pit north of the subject site in the 1950 topographic map has increased in size and contains a pond. A second gravel pit is located to the east of the subject site and also contains a small pond. Two additional gravel pits have been identified to the north and south of the subject site. Fire stations are identified to the north and east of the subject site. Sheridan School is identified west of the subject site. St. Peters School and Lincoln Heights School are identified to the southwest of the site. Pratt School, Englewood Cemetery, and a Drive-in Theatre are identified to the east of the site. Woodlard School and a Technical High School are identified to the north of the site. The previously identified NE City Boundary is now identified as the Corporate Boundary. A water tank is identified to the southeast of the subject site. A second water tank is identified to the northeast of the site.

1963 USGS Topographic Map, 1: 24,000

The 1973 topographic map is of the Spokane NE quadrangle and is prepared to a scale of 1:24,000. The map is centered on the subject site. The subject site appears in similar condition as the 1963 topographic map. Development surrounding the subject site has increased since the previous topographic map. A well is identified to the west of the subject site. The two gravel pits previously observed in the 1963 topographic map are now larger ponds. A third gravel pit identified in the 1963 topographic map located to the north of the subject site is now also presented as a small pond.

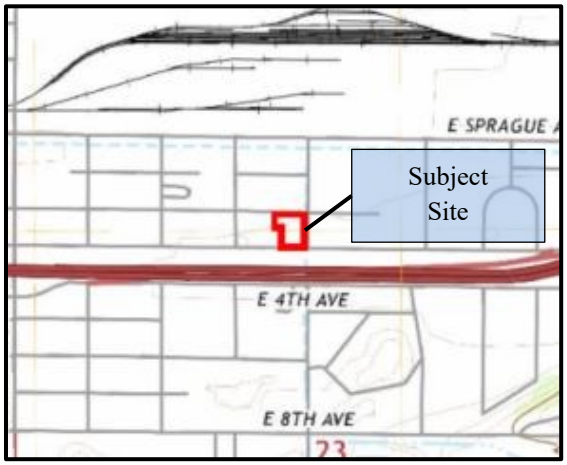

Interstate-90 located to the south of the subject site now is identified as a 6-lane roadway that transitions into a 4-lane roadway to the southeast of the subject site. A pipeline is identified to the south of the subject site running south-north but ending before reaching the subject site. Three water tanks are identified to the southeast of the subject site and two more northeast of the site. Two substations are identified to the southeast of the site. A well is visible to the southeast of the site. A trailer park can be seen east of the site. The previously identified railroad located south of the site is now named as old railroad grade. A portion of the U P Shops associated with the railway that runs adjacent to Sprague Avenue to the north of the site is now identified as C M St P & P Shops. The Technical High School identified to the north of the subject site in the 1963 topographic map is now identified as Spokane Community College.

1973 USGS Topographic Map, 1:24,000

The 1978 map is of the Spokane NE quadrangle and is prepared to a scale of 1:24,000. The map is not a topographic map and is therefore not to be used to describe topographic conditions.

The 1986 topographic map is of the Spokane NE quadrangle and is prepared to a scale of 1:24,000. Subject site conditions appear similar to the 1973 topographic map. Additional development is observed on the map in all directions from the subject site. The three gravel pits that became ponds as observed throughout the previous topographic maps have increased in size.

2020 USGS Topographic Map, 1:24,000

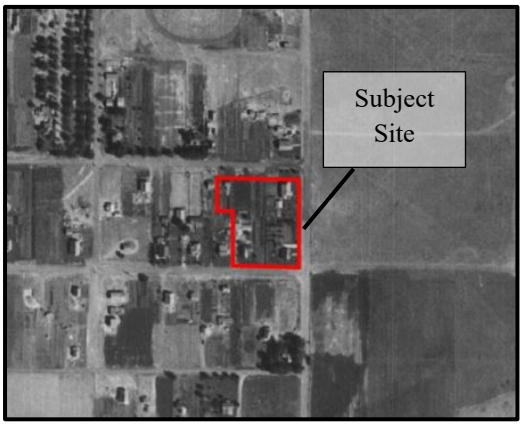

The 2014, 2017, and 2020 topographic maps are of the Spokane NE quadrangle and are prepared to a scale of 1:24,000. The maps are again centered on the subject site. No structures are shown on the map and few things are labeled aside from road names, but those changes appear to be more an issue of formatting than probable changes in regional conditions. Beginning in the 2014 topographic map, the gravel pit that turned pond throughout the previous topographic maps is now a significantly large body of water. Chester Creek is identified running east-west to the north of the subject site as well as running north-south directly east of the subject site.

5.2.2 Historical Aerial Photographs

Fulcrum requested available historical topographic maps from EDR. Historical aerial photographs, in Aerial Photo Decade Package Report inquiry number 7531876.8, are presented with the complete EDR report as Appendix D.

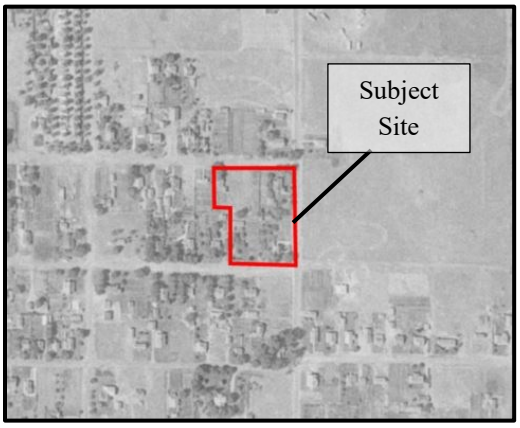

Aerial photographs were reviewed for the years 1938, 1946, 1951, 1953, 1962, 1972, 1977, 1982, 1991, 1995, 2006, 2011, 2015, and 2019. A review summary of aerial photographs is provided below with select photos for reference.

The 1938 historical aerial photograph is in black and white with good resolution and is centered on the subject site. The subject site appears to be developed by several structures. The site is observed to be surrounded on the north, south, and east borders by roads. The surrounding area consists of both agricultural land and residential houses. A potential apple orchard is observed northwest of the subject site. A railroad can be seen running east-west with a track diverging north located to the north of the subject site. A large, forested area is observed to the southeast of the subject site.

1938 Aerial Photograph

The 1946 historical aerial photograph is in black and white and is in poor condition. No site details can be discerned in this photograph.

1951 Aerial Photograph

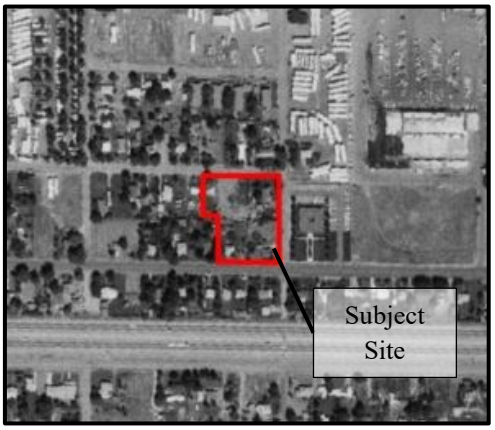

The 1951 historical aerial photograph is in black and white with poor to good resolution and is centered on the subject site. No changes are observed on the subject site from the 1938 historical aerial photograph. Significant residential development is observed to the west, south, and southeast of the site.

The 1953 historical aerial photograph is in black and white and is in poor condition. No site details can be discerned in this photograph.

The 1962 historical aerial photograph is in black and white with good resolution and is centered on the subject site. In the historical photograph there are approximately six structures observed to be located on the subject site: one in the northwest corner, two in the northeast corner, one in the southeast corner, and two in the southwest corner. Four structures resembling trailers are observed in the central western portion of the subject site. Additional development is observed in all directions from the site. Two commercial buildings are located east of the site. A major multi-lane roadway is observed to the south of the site. The railroad tracks observed in the previous historical aerial photographs to the north of the site have expanded to contain numerous tracks and storage yards.

1962 Aerial Photograph

1972 Aerial Photograph

The 1972 historical aerial photograph is in black and white with fair resolution and is centered on the subject site. The photograph shows similar site conditions as the 1962 historical aerial photograph, with the trailers observed in the 1962 photograph no longer onsite. Additional development is observed in all directions of the subject site. The train depot to the north of the subject site has expanded. A baseball field is observed northwest of the site. A racetrack and a gravel pit are observed north of the site. A second gravel pit is observed southeast of the site.

The 1977 historical aerial photograph is in black and white with poor to good resolution and is centered on the subject site. The photograph shows similar site conditions as the 1972 historical aerial photograph, with an additional small structure observed in the southeast corner totaling seven onsite structures. An additional area to the north of the subject site is observed to be utilized as storage space for the train depot.

The 1982 historical aerial photograph is in color with poor to good resolution and is centered on the subject site. The photograph shows similar site conditions as the 1972 historical aerial photograph. The gravel pit identified to the southeast of the site in the 1972 historical aerial photograph is observed to have a small body of water within.

The 1991 historical aerial photograph is in black and white and is in poor condition. No site details can be discerned in this photograph.

2006 Aerial Photograph

The 1995 historical aerial photograph is in black and white and is in fair condition. The 2006 historical photograph is in color with good resolution. A large commercial building is observed to the northeast of the site. In the 2006 historical photograph one of the structures in the southwest corner is no longer observed. The subject site has what appears to be miscellaneous storage of unidentifiable materials within the west central portion of the site. In the 2006 historical photograph, the small body of water within the gravel pit to the southeast of the subject site observed in previous photographs no longer has water. In the 2006 historical photograph the train depot to the north of the subject site is observed to be reducing in size, with a large commercial building observed in the southeast corner of the depot.

The 2011 and 2015 historical aerial photographs are in color with good resolution. The photograph shows similar site and surrounding conditions as the 2006 historical aerial photograph. An additional structure resembling a trailer is observed in the central area along the northern property line. The storage of miscellaneous unidentified materials increased in size from the 2006 historical aerial photograph. In the 2015 historical aerial photograph the train depot is observed to be further reduced in size, with an additional large commercial building located in the southwest corner of the depot.

The 2019 historical aerial photograph is in color and is centered on the subject site. The previously identified structures remain, with cars, a pool, and additional miscellaneous materials observed throughout the site mostly concentrated on the eastern portion of the subject site.

2019 Aerial Photograph

5.2.3 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps (Sanborn maps) were requested from EDR as a portion of inquiry 7531876.3. The complete EDR report is presented in Appendix D. The subject site lies in a location unmapped by Sanborn Maps. No Sanborn Maps were available for the subject site.

5.3 City and County Agencies

5.3.1 Right-of-Ways and Easements

Fulcrum's research identified a right-of-way associated with the subject site via the Spokane Valley Community and Public Works Department. The right-of-way was established on July 5, 2022 to remove gas service. Fulcrum did not identify easements associated with the subject site.

See Appendix C for right-of-way documentation.

5.3.2 Environmental Liens

No specific references to environmental liens or other concerns were noted during Fulcrum's review of documents on file with Ecology, Ecology Toxics Cleanup Program Web Reporting, or other public records related to the subject site.

5.3.3 Spokane County Assessor's Department

The Spokane County Assessor website was queried for information associated with the subject site. The Assessor indicates that the parcels are zoned as residential. Both parcels are owned by Wheeler Investments & Development, LLC.

See Appendix C for Spokane Assessor documentation.

5.3.4 City of Spokane Planning Department

The Planning Department for the City of Spokane Valley website reported the following permits associated with the subject site:

- D0739: This gas fitters permit was approved on October 3, 1969 for a 110,000 BTU furnace located in the basement of the residence located at 228 South Carnahan road.
- 04008167: This permit was issued on November 1, 2004 for sewer connection services on parcel 35232.1503.
- SW-13001090: This permit was issued on June 25, 2013 for sewer connection services on parcel 35232.1509.
- BLD-2017-1777: This permit was approved on July 10, 2017 to reroof a structure on parcel 35232.1509.
- PRE-COMM-2022-0047: This permit pre-application was received on May 3, 2022 for the site to be converted into a commercial building. Fulcrum did not receive any documentation that the permit was approved.
- BLD-2022-2817: This permit was approved on July 12, 2022 to demolish one house and one garage on parcel 35232.1509.

See Appendix C for permitting documentation.

5.3.5 Spokane County Parcel Information

The Spokane County website searched for information regarding the subject site parcels. Documentation showing that the subject site parcel 35232.1509 was previously separated into five (5) separate parcels: 35232.1501, 35232.1502, 35232.1506, 35232.1507, and 35232.1508 which were later merged into one parcel number 35232.1509 in September of 2002.

See Appendix C for parcel documentation.

5.3.6 City of Spokane Fire/Hazmat Department

Fulcrum contacted the City of Spokane Valley to request historical fire or hazmat activity on the subject site. The city did not respond prior to the issuance of this report.

5.3.7 Utility Providers

- Electrical utility is provided by Avista Utilities
- Water and sewer services are provided by the Carnhope Irrigation District #7
- Garbage and Solid waste are provided by the City of Spokane Valley.

5.4 City and County Directories

Polk City Directories and Cole Information Services are nationally published cross-referenced telephone and address listings. Depending on the size of a town, city, or county, directories may have been published on an annual or inconsistent basis. Polk Directories can be used to identify the business or businesses located at the site address and corresponding phone numbers or other information. Occasionally, a store manager may be identified as a site contact. Polk Directories can be reviewed by either address or business name to identify significant changes in ownership, business names, or site activities.

Fulcrum requested available city directories data from EDR. Available city directory data provided from Cole Information Services and Polk City Directories is presented as follows:

Table 1: City Directories Summary

Year	Subject Site		Adjacent Sites		
	5008 East 2nd Ave	228 South Carnahan Road	5006 East 2nd Ave	5105 East 3rd Ave	5005 East 3rd Ave
2020	Dolores Ross	Colleen Thorton	Jim Steiner, Ray Swanson, Tori French	Albrecht Law, Inspires Credit Union, Commodities Plus, Digi Deal Corp, Jason Bryan	Kimberly Carroll, Paul Carroll, Rick Vandouris
2017	-	Teres Hotchkiss	Ray Swanson	Cancer Care Northwest PS	Rick Vandouris
2014	-	Tony Hotchkiss	Jim Steiner	Cancer Care Northwest PS	Rick Vandouris
2010	-	Dale Hotchkiss	Jim Steiner	Cancer Care Northwest PS	Lenonard Danna
2005	Michael Wingenter	-	-	-	-
2000	D A Carrell	-	Occupant Unknown	-	-
1995	-	Occupant Unknown	-	Pacific Gas Transmission Co	-
1992	-	M Ebat	-	Pacific Gas Transmission	-
1989	No Return	John Austin	David Schudel	Pacific Gas Transmission Co	Deal Villa
1984	Dan Centenari	Vacant	Vacant	Pacific Gas Transmission Co	Paul Peterson
1979	Pauline Brokaw	H Kedish	Vacant	Pacific Gas Transmission Co	Mildred Anderson
1974	Pauline Brokaw	Max Tucker	Frank Starkey	Pacific Gas Transmission Co	Mildred Anderson
1969	Pauline Brokaw	Dale Vierth	Frank Starkey	Pacific Gas Transmission Co	Mildred Anderson
1966	Pauline Brokaw	Edw Haase	Pearl Douglas	Pacific Gas Transmission Co	Melvin Anderson
1963	Pauline Brokaw	Edw Haase	Darrell Noble	Pacific Gas Transmission Co	Melvin Anderson

- Address not listed in directory.

Results of provided City Directories information reviewed for the subject site are consistent with other historical review records. The complete EDR-City Directory Image Report number 7531876.5 is presented with the complete EDR report as Appendix D.

6.0 REGULATORY REVIEW

As part of this Phase I ESA, a search was completed for available federal and state environmental record sources.

EDR prepared a Radius Map™ Report with GeoCheck®, inquiry number 7531876.2s, for the subject site. The report provided a Practice required search radius around the subject site. The typical EDR Report includes more than 70 searched databases. Fulcrum completed a review of site data presented in the EDR for the subject site, as well as surrounding properties of concern, through information available on the Washington State Department of Ecology's (Ecology) website. Fulcrum's records search was supplemented by EDR in accordance with the practice and industry standard. Database abbreviations, located in a glossary within the EDR Radius Map™ Report with GeoCheck®, are presented with the complete EDR report as Appendix D.

6.1 Subject Site

The subject site was identified as listed on the Asbestos database. A notification date for abatement work was submitted by Air Tech Abatement Technologies on June 27, 2022 and the work was reported to have been completed on July 8, 2022. Asbestos materials that were listed as having been abated were cement asbestos board and asbestos containing popcorn ceiling. No additional information was available from online databases.

6.2 Offsite Locations Requiring Additional Research

Based on Fulcrum's review of the EDR Report, the following site listings were reviewed on Ecology's online databases:

- 5206 East Sprague Avenue – Gull 1622
- 5303 East 3rd Avenue – Northwestern Pizza Supply Co
- 5204 East Sprague Avenue – Fred Meyer INC Spokane
- 5309 East 3rd Avenue – WA ID MT Carpenters Retirement Trust
- 8th & Carnahan Street – Central Pre-Mix Concrete Co.
- 5621 East Sprague Avenue – D & B Power Sports
- 5515 Eastwood – Dishman Concrete Products INC
- 6000-6800 Sprague Avenue – Upper East Francher Road
- 6401 East Sprague Avenue – Alton's Tire & Automotive Centers INC SPR

6.2.1 Gull 1622

The site, as a specific geographical location, appeared on the UST database (UST ID #7747; Facility Site ID #31448862) as facility name Gull 1622 and is located at 5206 East Sprague Avenue. This location is listed as located topographically downgradient and approximately 0.137 miles northeast of the subject site.

Available subject site records in Ecology's online database and EDR reporting indicate four steel tanks that were installed in 1962 and removed in 1996. Two of the tanks contained unleaded gasoline, one tank contained leaded gasoline, and one of the tanks was used for waste oil. No additional information was available from public records at Ecology's regional office.

It is Fulcrums professional opinion it is unlikely for this site to have resulted in adverse impact to the subject site.

6.2.2 Northwestern Pizza Supply Co

The site, as a specific geographical location, appeared on the UST database (UST ID #11753; Facility Site ID #39576246) as facility name Northwestern Pizza Supply Co and is located at 5303 East 3rd Avenue. This location is listed as located topographically upgradient and approximately 0.145 miles east of the subject site.

Available subject site records in Ecology's online database and EDR reporting indicated two steel tanks that were installed in 1964 and removed in 1996. One tank was used for used oil/waste oil and the second tank was used for unleaded gasoline. No additional information was available from public records at Ecology's regional office.

It is Fulcrums professional opinion it is unlikely for this site to have resulted in adverse impact to the subject site.

6.2.3 Fred Meyer INC Spokane

The site, as a specific geographical location, appeared on the Independent Cleanup Reports database (Site register issue #92-04) as facility name Fred Meyer INC Spokane and is located at 5204 East Sprague Avenue. This location is listed as located topographically downgradient and approximately 0.148 miles northeast of the subject site.

EDR reports that petroleum products were detected in the soil from a remedial action report Ecology received in 1991 from either the owner or operator of the site. The actions were conducted without department oversight or approval and are not under an order or decree. Ecology records show that a final cleanup report was received. No additional information was available on Ecology's Online database or EDR reporting.

It is Fulcrums professional opinion it is unlikely for this site to have resulted in adverse impact to the subject site.

6.2.4 WA ID MT Carpenters Retirement Trust

The site, as a specific geographical location, appeared on the UST database (UST ID #620271; Facility Site ID #16220) as facility name WA ID MT Carpenters Retirement Trust and is located at 5309 East 3rd Avenue. This location is listed as located topographically upgradient and approximately 0.148 miles east of the subject site.

Available subject site records in Ecology's online database and EDR reporting indicate three steel tanks were removed from the site. One tank was reported to contain used oil/waste oil with a capacity of 500-gallons, the second tank was reported to contain leaded gasoline with a capacity of 10,000-gallons, the third tank was reported to contain diesel with a capacity of 10,000-gallons. The tanks are listed as having been installed before 2003 and removed in 2016. No additional information was available from public records at Ecology's regional office.

It is Fulcrums professional opinion it is unlikely for this site to have resulted in adverse impact to the subject site.

6.2.5 Central Pre-Mix Concrete Co.

The site, as a specific geographical location, appeared on the Solid Waste Facility/Landfill database (Facility Site ID #928, 984, 985) as facility name Central Pre-Mix Concrete Co. and is located at 8th & Carnahan. This location is listed as located topographically upgradient and approximately 0.316 miles south of the subject site.

Available subject site records in EDR reporting indicate that the facility type was permitted for "pile of inert waste" and recycling. Ecology's online database indicates that the solid waste landfill began operation in 1900. No additional information was available from public records at Ecology's regional office.

It is Fulcrums professional opinion it is unlikely for this site to have resulted in adverse impact to the subject site.

6.2.6 B & D Power Sports

The site, as a specific geographical location, appeared on the UST database (UST ID #619449; Facility Site ID #657970) as facility name B & D Power Sports and is located at 5621 East Sprague Avenue. This location is listed as located topographically upgradient and approximately 0.390 miles east of the subject site.

Available subject site records in Ecology's online database and EDR reporting indicate one 1,000-gallon steel gasoline tank was removed from the site. The tanks are listed as having been removed in 2008, with an unreported installation date. No additional information was available from public records at Ecology's regional office.

It is Fulcrums professional opinion it is unlikely for this site to have resulted in adverse impact to the subject site.

6.2.7 Dishman Concrete Products INC

The site, as a specific geographical location, appeared on the UST database (UST ID #102048; Facility Site ID #44132295) as facility name Dishman Concrete Products INC and is located at 5515 Eastwood. This location is listed as located topographically upgradient and approximately 0.413 miles southeast of the subject site.

Available subject site records in Ecology's online database and EDR reporting indicate two (2) 111 to 1,100-gallon leaded-gasoline containing steel tanks were removed from the site. The tanks are listed as having been installed in 1964 and removed in 1996. No additional information was available from public records at Ecology's regional office.

It is Fulcrums professional opinion it is unlikely for this site to have resulted in adverse impact to the subject site.

6.2.8 Upper Francher Road E

The site, as a specific geographical location, appeared on the Historic Sites List (Facility Site ID #755) and CSCSL databases (Cleanup Site ID #87) as facility name Upper Francher Road E and is located at 6000-6800 Sprague Avenue. This location is listed as located topographically upgradient and approximately 0.556 miles northeast of the subject site.

Available subject site records in Ecology's online database and EDR reporting indicate that in August of 1995, Ecology was notified that a historic release of petroleum hydrocarbons and lead had been discovered onsite. Soil sampling confirmed the presence of Arsenic, Cadmium, Lead, and petroleum hydrocarbons in concentrations that exceed MTCA Method A Cleanup Levels. Ecology lists the site as awaiting cleanup.

No additional information was available from public records at Ecology's regional office. It is Fulcrums professional opinion it is unlikely for this site to have resulted in adverse impact to the subject site.

6.2.9 Alton's Tire & Automotive Centers INC SPR

The site, as a specific geographical location, appeared on the CSCSL, LUST and UST databases (LUST ID #7923; UST ID #4865; Facility Site ID #1217628) as facility name Alton's Tire & Automotive Centers INC SPR and is located at 6401 East Sprague Avenue. This location is listed as located topographically upgradient and approximately 0.859 miles east of the subject site.

Available subject site records in Ecology's online database and EDR reporting indicate five (5) underground storage tanks were installed in 1964. Two tanks reportedly contained unleaded gasoline, two tanks reportedly contained leaded gasoline, and one tank reportedly contained diesel. A LUST release was reported in October of 1990 with an undocumented extent. Independent Action has begun cleanup on the site after confirming petroleum contamination that exceeded MTCA Method A Cleanup Levels. Ecology lists the site as having started cleanup. Ecology reporting shows that a LUST report was received in May of 2014.

No additional information was available from public records at Ecology's regional office.
It is Fulcrums professional opinion it is unlikely for this site to have resulted in adverse impact to the subject site.

6.3 Orphan Sites

The orphan summary is a list of sites whose map locations were ambiguous due to inadequate site address or poor site location on file. The following sites were listed on the Orphan Summary:

220 East 2nd Avenue – This site is listed on the ICR database as Jones Radiator (Kirishian Property). Fulcrum's research into the site location estimated the site to be 6.5 miles east of the subject site. Fulcrum's research into the site address on the Ecology Cleanup search found that the site received an NFA in 2011 following cleanup of a LUST event. Based on distance from the subject site, it is Fulcrum's opinion this site is unlikely to have adverse impact on the subject site.

410 North Fancher Road – This site is listed on the ICR database as FIB Property. Fulcrum's research into the site location estimated the site to be 0.69 miles northwest of the subject site and downgradient. Fulcrum's research into the site address on the Ecology Cleanup search found that the site received an NFA in 2011 following cleanup of a LUST event. Based on distance from the subject site and inferred groundwater flow direction, it is Fulcrum's opinion this site is unlikely to have adverse impact on the subject site.

4315 East Sprague Avenue – This site is listed on the ICR database as Union Pacific Railroad.

Fulcrum's research into the site location estimated the site to be 0.45 miles east of the subject site and downgradient. Fulcrum's research into the site address on the Ecology Cleanup search found that the site received an NFA in 2011 following cleanup of a LUST event. Based on distance from the subject site and inferred groundwater flow direction, it is Fulcrum's opinion this site is unlikely to have adverse impact on the subject site.

822 East Pacific Avenue – This site is listed on the ICR database as Bestway Trucking. Fulcrum's research into the site location estimated the site to be 1.27 miles northeast of the subject site. Fulcrum's research into the site address on the Ecology Cleanup search found that the site received cleanup has started on the site for a petroleum LUST event that was discovered in 1990. Based on distance from the subject site and inferred groundwater flow direction, it is Fulcrum's opinion this site is unlikely to have adverse impact on the subject site.

Sprague Avenue & Fancher Road – This site is listed on the VCP database as Upper Francher Road West. Fulcrum's research into the site location determined the site was under a different name: Upper Francher Road East, which is discussed in section 6.2.8.

7.0 SITE RECONNAISSANCE

On January 10, 2024, Scott Groat, an Environmental Professional with Fulcrum, and Abby Whitmore, an Environmental Technician, also with Fulcrum, completed a site walk at the subject site. See Appendix E for site photographs.

7.1 Site Development

The subject site is comprised of two parcels totaling approximately 1.35-acres and was observed to be occupied by a single-family 1-story residential home with one detached one-car garage in the northeast corner, and one shed in the southwest area. The subject site can be accessed from the northwest by East 2nd Avenue, the northeast by South Carnahan Road, and the southeast by South Carnahan Road. The subject site sits on relatively flat terrain.

View of subject site from the southwest area

At the time of the inspection, the subject site was observed to be bound by residential properties to the west, with East 2nd Avenue to the north, South Carnahan Road to the east, and East 3rd Avenue to the south.

During the site walk Fulcrum observed the balance of the subject site to consist of vacant land with general debris located in the southwest area of the site where a structure previously was located.

A single-family residence with one detached garage is located on the northeast portion of the site. Fulcrum entered the structures to visually assess potential hazardous materials. Fulcrum identified the following suspect materials for asbestos:

- Residence – sheet vinyl floor, wallpaper, gypsum wallboard systems, and ACM-cloth wire wrap

Fulcrum was unable to enter the shed located in the southwest area of the subject site.

Fulcrum notes the potential for the following conditions associated with the structures onsite:

- Radon
- Asbestos Containing Materials
- Lead
- Lighting and Electrical Components

A general site location map is presented as Figure 1 and a detailed site map is presented as Figure 2. Site photographs are presented as Appendix E.

7.1.1 Site Utilities

One fire hydrant was observed in the southwest corner of the subject site. Power lines were observed running east-west through the center of the subject site.

7.1.2 Site Petroleum Hydrocarbon Usage, Storage, and Disposal

According to Ecology's online database, available site records do not report the presence of a historical or existing underground storage tank or above ground storage tank for the subject site. During the site walk, Fulcrum did not observe any evidence of historical or existing underground storage tanks. One floor drain was observed in the basement of the residence. Fulcrum did not observe any sign of petroleum staining or evidence of hazardous materials having been disposed of through the basement floor drain.

7.1.3 Site Hazardous Materials Usage, Storage, and Disposal

Fulcrum did not observe any evidence of hazardous material use, storage, or disposal. Potential does exist for minor storage chemicals associated with the residence structures. Observed contents within the garage consisted of general automotive maintenance products.

7.1.4 Site Drainage

Local topographic surface water drainage appears to flow to the northwest toward the Spokane River. Fulcrum's inspection identified that approximately 90 percent of the subject site consisted of permeable ground surfaces. Precipitation is likely to be absorbed into the ground in permeable areas and runoff is unlikely.

7.1.5 Pits, Ponds, and Lagoons

Fulcrum inspected the subject site for the presence of sumps, pits, surface impoundments, wells, cisterns, oil-water separators, or septic tanks. No pits, ponds, or lagoons were identified during the site survey.

7.1.6 General Site Debris

Onsite debris observed by Fulcrum generally consisted of building remnants from a structure that had previously been onsite including a damaged concrete pad, bricks, wood, and broken glass located in the southwest area of the subject site.

8.0 INTERVIEWS AND QUESTIONNAIRE

8.1 Interview

During the site reconnaissance, Fulcrum spoke with parties familiar with the subject site, including M.J "Jack" Kestell, Mr. Kestell reported that parcel 35232.1509 was previously multiple separate parcels that later had been merged into one. Mr. Kestell also reported that the structures observed in the most recent aerial photographs located in the northwest corner and the southeast corner of the subject site had been demolished in the last two years. Mr. Wheeler reported that the current owner had planned on converting the vacant land into commercial real-estate but later decided to sell the site instead. See section 5.3.4 for the commercial building pre-application and building plans. Mr. Kestell did not indicate any other information associated with environmental conditions associated with the site.

The current tenant of the residence accompanied Fulcrum while inspecting the residence. The tenant reported that the current heating system is gas, and that the historic heating oil tank in the basement had been removed and the heating system was converted into a forced air system in the 1970's. The tenant did not indicate any other information associated with environmental conditions associated with the site.

8.2 User and Environmental Questionnaires

Fulcrum received a completed Environmental Questionnaire from Bob Spooner, the Senior Commercial and Leasing Manager for Goodale & Barbieri Company. Mr. Spooner indicated that the previous owner of the subject site is identified as Wheeler Investments and Development LLC., and that the subject site currently presents as a vacant lot and a lot that contains one residential house with past uses of the site being residential. Mr. Spooner indicated that the planned used for the property after acquisition is for residential development. Mr. Spooner did not state that he had knowledge of any adverse environmental conditions associated with the subject site.

Please see Appendix B for the User provided Questionnaire.

9.0 FINDINGS AND OPINIONS

Fulcrum observed the subject site to consist of two Spokane County tax parcels: 35232.1509 which is 1.24-acres and 35232.1503 which is 0.11-acres totaling approximately 1.35-acres in Spokane Valley, Washington. The site was accessed by East 2nd Avenue and South Carnahan Road and consisted of one single-family 1-story residential home, one detached garage, and one shed with permeable ground surface that was relatively flat. One fire hydrant was observed near the southwest boundary of the site. Power lines were observed running east-west through the center of the site.

Historical maps and photographs display the subject site to have structures in the northeast, southeast, and along the western property boundary dating back prior to 1938.

Debris including concrete, wood, and other building materials were observed on the subject site property consisting of building remnants. No areas of soil staining or stressed vegetation were observed on the subject site. The usage, storage, or disposal of regulated substances was not observed during Fulcrum's site investigation.

9.1 Recognized Environmental Conditions

Fulcrum's research into past and present activities, and current conditions of the property did not identify any *Recognized Environmental Conditions* associated with the subject site.

9.2 Business Environmental Risks

Fulcrum's investigation identified the following *Business Environmental Risks* associated with the subject site:

- General Debris
- Radon
- Asbestos Containing Materials
- Lead
- Lighting and Electrical Components

Fulcrum's review of non-ASTM scope considerations are presented as Business Environmental Risks. Further detail of Fulcrum's non-scope considerations are presented in Section 12.0.

9.3 De Minimis Conditions

De Minimis Conditions are conditions that generally do not present a threat to human health or the environment and would not be the subject of an enforcement action. Fulcrum did not identify any de minimis conditions in connection with the subject site.

10.0 DATA GAPS

Fulcrum's Phase I ESA research attempted to identify and review reasonable ascertainable information regarding environmental conditions at the subject site. Sources of information that could not be reviewed, either because information could not be accessed or reviewed within the time limitations of this report, or because information for the subject site did not exist include the following:

- Absence of Records Review at Ecology's Eastern Regional Office Records Division For this investigation, Fulcrum does not believe the absence of review of additional offsite locations at the Washington State Department of Ecology's Records Division prior to the completion of the Phase I ESA is a significant concern and is unlikely to result in identification of a Recognized Environmental Condition at the site that was not identified in other reviewed sources.

- Absence of fire/EMS records associated with the subject site – Based on the available information regarding the site, it is Fulcrum's opinion that the absence of these records would not pose any adverse environmental impact to the subject site.

It is Fulcrum's professional opinion that the identified data gaps are unlikely to result in any substantive changes to the findings and conclusions of this investigation.

11.0 CONCLUSIONS

Fulcrum has performed this Phase I ESA in conformation with the scope and limitations of ASTM Practice E1527-21 and ASTM E2247-16 for the defined subject site area. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report.

Fulcrum's research into past and present activities, and current conditions of the property did not identify any *Recognized Environmental Conditions* associated with the subject site.

Fulcrum's investigation identified the following non-ASTM scope *Business Environmental Risks* associated with the subject site:

- General Debris
- Radon
- Asbestos Containing Materials
- Lead
- Lighting and Electrical Components

Fulcrum's research into past and present activities, and current conditions of the property did not identify any *De Minimis Conditions* associated with the subject site.

12.0 NON-SCOPE CONSIDERATIONS

Fulcrum's review of non-ASTM scope considerations are presented as Business Environmental Risks. Business Environmental Risks are issues that a potential purchaser may want to take into consideration during a land transaction, lease, or development planning, but do not rise to the ASTM-defined level of a *Recognized Environmental Condition*. Fulcrum's proposed Phase I ESA scope of work concluded the following non-scope *Business Environmental Risks (BER)*:

- General Debris
- Radon
- Asbestos Containing Materials

- Lead
- Lighting and Electrical Components

12.1 General Debris

During Fulcrum's onsite investigation activities debris were observed consisting of building remnants such as a damaged concrete pad, bricks, wood, and broken glass located in the southwest area of the site where a structure was previously located.

12.2 Radon

Radon is a naturally occurring radioactive gas found in the earth's rock and soil. Radon is formed by the natural breakdown of radium, which is a radioactive product of decaying uranium. Radon gas percolates up through porous soils and enters a home or building through gaps and cracks in the foundation or the insulation, and through pipes, sumps, drains, walls, or other openings. Radon gas is linked to serious health risks, such as lung cancer. Radon gas is considered a greater risk in buildings with basements or other soil penetrations that provide direct connection to occupant spaces.

According to the EDR report generated for the subject site, the EPA radon zone for Spokane County is less than two (<2) and greater than four (>4) picocuries per liter (pCi/L). This range represents typical levels of radon found in local homes. The report also indicated that radon concentrations for a first floor living area in the vicinity of the subject site averaged 0.700 pCi/L, and a basement area averaged 14.096 pCi/L. Radon levels in homes or buildings are site-specific and can vary from structure to structure. Radon gas levels may be low in one building, but the next lot may have high indoor levels. Radon gas levels provided by EDR, in the Radius Map Report with GeoCheck inquiry number 7531876.2s, are presented with the complete EDR report as Appendix D.

12.3 Asbestos Containing Materials

An asbestos containing material is defined by state and federal regulations as "any material that contains greater than 1% asbestos". Asbestos containing materials (ACM) were used extensively from the early 1900s to the late 1970s, when the manufacture of most asbestos products was banned in the U.S. The ban did not include all products nor the use and application of asbestos products. Therefore, suspect ACM may be present in structures built after the initial ACM ban.

Interior building components appeared to be typical of the age of construction/renovation and type of use.

An inspection for ACM is required prior to impacting activities, including but not limited to renovation, demolition, repair, or maintenance. Fulcrum notes potential ACM materials to be present within the onsite structures.

12.4 Lead Containing Materials

Painted surfaces on or within onsite buildings may contain lead-based paint (LBP). Lead-based paint was used extensively for residential and commercial paint until the late 1970s and is still available for commercial, industrial, and specialty use. Exposure to lead in paint is a potential health concern when paint is damaged during normal use or is ground, sanded, or abraded during renovation or demolition. Lead content in paint cannot be determined without sampling and analysis. Lead-based paint in good condition does not constitute a health hazard nor is it considered a health risk.

12.5 Lighting and Electrical Components

Lighting and electrical equipment is a general term that refers to potential waste streams associated with all electrical equipment. Waste can include transformers and ballasts with polychlorinated biphenyls (PCB), non-PCB ballasts, mercury vapor tubes and bulbs, mercury switches, and other waste streams. Electrical transformers have utilized mineral oil mixed with varying quantities of PCB as dielectric fluid since the early 1950s. PCB was also commonly used in light ballasts prior to 1978. Light ballasts have also been shown to contain other hazardous materials besides PCB.

13.0 LIMITATIONS

Fulcrum Environmental Consulting, Inc. has performed professional services in accordance with generally accepted professional consulting principles and ASTM Practice E1527-21. No other warranty, expressed or implied, is made. The conclusions are based upon field observations and information research. Industry standard for Phase I ESA recommends that the information reported in Phase I ESA is accurate for six months from report date. The work described herein is intended for the exclusive use of the client. Any reliance on this report by a third party is at that party's sole risk.

Services did not include evaluation of conditions and factors typically considered outside the scope of ASTM-based environmental assessments, except for those specifically identified in the proposal. Out of scope considerations include, but are not limited to, evaluation of regulatory compliance, endangered species determination, indoor air quality, health and safety, clandestine lab use, and activity and use limitations.

Opinions contained in this report apply to conditions existing at the time services were performed. Fulcrum Environmental Consulting, Inc. is not responsible for the impact of changes in environmental standards, practices, or regulations subsequent to the performance of services. Fulcrum Environmental Consulting, Inc. does not warrant the accuracy of information supplied by others or the use of segregated portions of this report. Fulcrum Environmental Consulting, Inc. assumes no liability for conditions that were not included in our scope of work, or conditions not generally recognized as predictable when services were performed.

APPENDIX A

Environmental Professional Qualifications

PERSONNEL QUALIFICATIONS

Regional Manager/Project Scientist: Scott Groat, PG

Mr. Groat is a Project Scientist and has been in the environmental industry since 2016 and with Fulcrum since 2017. He provides project management and technical support for Phase I, II, & III environmental site assessments throughout Eastern Washington, as well as environmental work in geology, hydrogeology, industrial hygiene, asbestos surveys, and indoor air quality and mold investigations. Mr. Groat received his Bachelor's degree in Earth and Environmental Science from the University of Illinois at Chicago in 2015.

Mr. Groat is a Washington State Professional Geologist (PG), an AHERA Accredited Asbestos Building Inspector, EPA Accredited Lead Paint Inspector/Risk Assessor, a Washington State Registered UST Site Assessor, a Washington State Certified Erosion Control and Sediment Lead (CECSL), EPA-accredited Lead Renovation, Repair, and Painting (RRP) certified, and is OSHA/WISHA 40-Hour HAZWOPER trained. Mr. Groat's education, training, and certifications demonstrate that he is an Environmental Professional as defined by the Environmental Protection Agency's All Appropriate Inquiry, 40 CFR 312.

Senior Environmental Scientist: Kelsey Best

Mrs. Best is a Field Manager and has been with Fulcrum since 2013. She provides technical support for environmental site assessments throughout Eastern Washington and Northern Idaho, as well as environmental work in geology, hydrogeology, and hazardous materials management. Kelsey received her Bachelor's degree in Physical Geography from Eastern Washington University with a double minor in Water Resource Technology, and Wetland Science in 2013.

Kelsey is an AHERA Accredited Asbestos Building Inspector, NIOSH 582 PCM Microscopist, and a Washington State Registered UST Site Assessor and Decommissioner. Mrs. Best's education, training, and certifications demonstrate that he is an Environmental Professional as defined by the Environmental Protection Agency's All Appropriate Inquiry, 40 CFR 312.

Environmental Technician: Abby Whitmore

Ms. Whitmore is an Environmental Technician and has been with Fulcrum since 2022. She provides technical support for Phase I Environmental Site Assessments, groundwater investigations, indoor air quality investigations, and hazardous building materials inspections throughout Central and Eastern Washington and Northern Idaho. Ms. Whitmore graduated from The University of Maine with a Bachelor of Science in Ecology and Environmental Sciences with Concentrations in Sustainability, Natural Resource Management, and Environmental Policy.

Abby is an AHERA Accredited Asbestos Building Inspector and a Washington State Certified Erosion Control and Sediment Lead (CESCL).

DECLARATIVE STATEMENTS

We, declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in ASTM E2247-16 and §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set in and ASTM E2247-16 and 40 CFR Part 312.

User Provided Documents

Site Owner, Occupant, Site Manager, or User Questionnaire

FULCRUM environmental consulting

The following questionnaire is designed to assist the Environmental Professional in completion of the requested Environmental Site review. Information presented herein is designed to be used only in the production of the site report.

Site: Parcel 35232.1509 and 35232.1503 Address: 228 S Carnahan and 5008 E. 2nd ave

1. The size of the property: 2+- acres 2. Tax or property identification number: Parcel 35232.1509 and 35232.1503

The questionnaire was completed by: Name: Bob Spooner Title: Senior Commercail and leasing manager

Firm: Goodale and BArbieri Phone: 5099991959 Email: bob.spooner@g-b.com

Address: 818 W Riverside #300

If representing the seller, complete Parts A and C. If representing the buyer, complete Parts B and C.

PART A

I represent the ____ **Seller** as the ____ Owner, ____ Operator, ____ Agent, or Other _____

Role(s) at the site: _____ Number of years at the site: _____

The previous owner of the property was: Seller is Wheeler Investments and Development LLC Phone number/City: _____

I have provided to Fulcrum all previous environmental reports available to me? ____ **Yes** X **No**

1. What is the current site use? Vacant lot and home

2. Is the property developed? If so, number, type, and use of buildings: partially- 1 Home

3. Are you aware of any contamination on the property or on adjacent parcels? ____ Yes X No

4. What else should we know about the site? _____

Site: Parcel 35232.1509 and 35232.1503

FULCRUM environmental consulting

PART B

I represent the ____ **Buyer** as the ____ Future Owner, X Agent, or Other _____

1. The reason for performing the Phase I: Due Dilegence 2. Planned use of property: Residential Development

3. What was the past use(s) of the property to the best of your knowledge? Residential

4. Did a search of *recorded land title records* identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law? _____ Yes X No

5. Do you have any specialized knowledge or experience related to the property or nearby properties or past uses of the property? ____ Yes X No

For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

6. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? X Yes _____ No

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? _____ Yes _____ No

7. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a.) Do you know the past uses of the property?
(b.) Do you know of specific chemicals that are present or once were present at the property?
(c.) Do you know of spills or other chemical releases that have taken place at the property?
(d.) Do you know of any environmental cleanups that have taken place at the property?

8. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contaminant releases at the property? _____ Yes X No

9. What else should we know about the site? _____

I have provided to Fulcrum all previous environmental reports available to me? _____ Yes X No

FULCRUM environmental consulting

Additional Comments: _____

I have attached (#) _____ additional pages of comments.

I, the *Preparer of this Questionnaire* represent that to the best of my knowledge the above statements and facts are true and correct and have no material facts have been suppressed or misstated.

Signature Bob Spencer Date 1-2-24

OFFICIAL'S SIGNATURE

Date received in Assessor's Office 1-25-02
By (signature)

PLEASE READ BEFORE SIGNING: Division of land for the purposes of sale or lease must be divided in accordance with applicable state and local laws governing such divisions. (Contact your local City or County Planning Department for further information.) Complete this form and return with supporting documents, if any necessary for name changes, to the Spokane County Assessor's Office at 1116 W Broadway Ave, Spokane, WA 99260
Telephone: (509) 477-3698

*This segregation is for the division of property (same owner; sale or lease; or transfer of ownership (more than one owner), by recorded deed or contract.

* DATE: 1-25-02
OWNER'S OR AGENT'S SIGNATURE PHONE #'S

20020047

7. MAP

a) Identify the boundry of the segregation.

b) Together with the proposed segregation identify:

(1) boundary lines and dimensions
(2) sub-parcel identification, ie., Parcel A,B,C, 1,2,3, etc.; and

c) Show all existing buildings and indicate their distances from the original exterior property lines. If a copy of a survey is available, attach an 18 x 24 Blueline.

d) Provide legal descriptions for each proposed tax parcel and identify by the letter or number used on the map. EXAMPLE:

PARCEL A: The N 75' of the West 400' of the SW¼ of the SW¼ of Section 2, Township 24, Range 44, EWM. Except the West 30' thereof for roads.

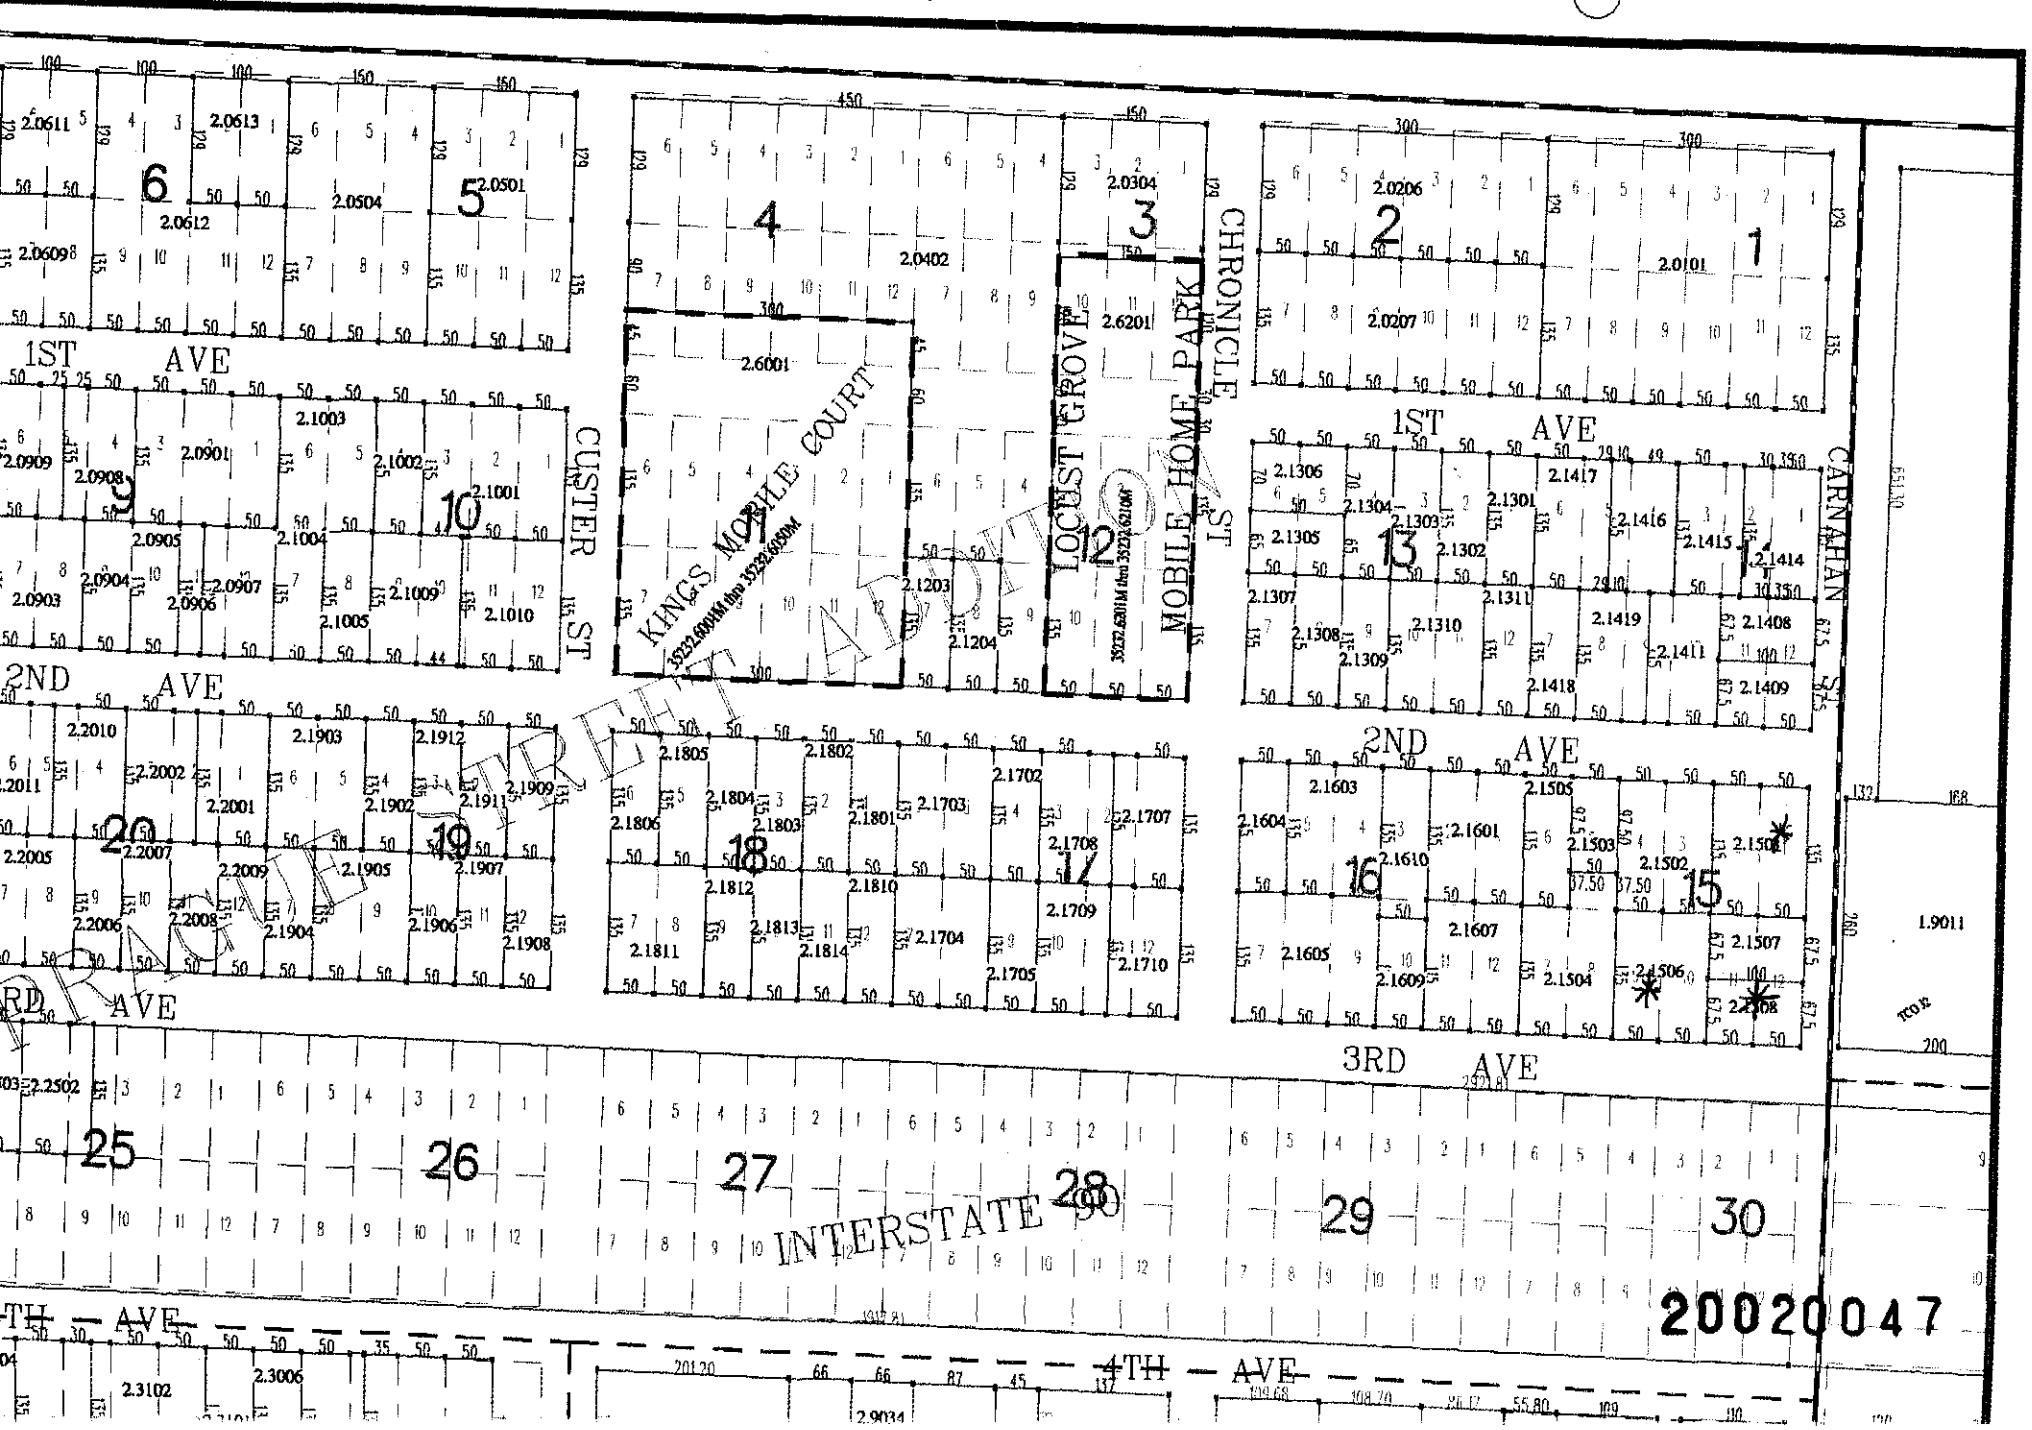

Attach sheets as necessay.

NOTE: The approval of this application by the County Assessor or his appointee shall not be construed as authorizing the division of lands for the purposes of sale or lease or buildable site.

This application is to be completed in its entirety before processing.

United States Department of Agriculture

NRCS

Natural Resources Conservation Service

A product of the National Cooperative Soil Survey, a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local participants

Custom Soil Resource Report for Spokane County, Washington

January 3, 2024

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Spokane County, Washington
Survey Area Data: Version 15, Aug 28, 2023

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 9, 2022—Aug 15, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
7105	Urban land, gravelly substratum, 0 to 15 percent slopes	0.8	19.4%
7110	Urban land-Opportunity, disturbed complex, 0 to 3 percent slopes	3.3	80.6%
Totals for Area of Interest		**4.1**	**100.0%**

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The

delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Spokane County, Washington

7105—Urban land, gravelly substratum, 0 to 15 percent slopes

Map Unit Setting

National map unit symbol: 2mdms
Elevation: 1,660 to 2,110 feet
Mean annual precipitation: 18 to 19 inches
Mean annual air temperature: 46 to 50 degrees F
Frost-free period: 100 to 130 days
Farmland classification: Not prime farmland

Map Unit Composition

Urban land, gravelly substratum: 95 percent
Minor components: 5 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Urban Land, Gravelly Substratum

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 8
Hydric soil rating: No

Minor Components

Opportunity, disturbed

Percent of map unit: 3 percent
Landform: Outwash plains
Landform position (three-dimensional): Tread
Down-slope shape: Linear
Across-slope shape: Linear
Other vegetative classification: ponderosa pine/Idaho fescue (CN140)
Hydric soil rating: No

Marble, disturbed

Percent of map unit: 2 percent
Landform: Outwash plains
Landform position (three-dimensional): Tread
Down-slope shape: Linear
Across-slope shape: Linear
Other vegetative classification: ponderosa pine/Idaho fescue (CN140)
Hydric soil rating: No

7110—Urban land-Opportunity, disturbed complex, 0 to 3 percent slopes

Map Unit Setting

National map unit symbol: 2mdmw
Elevation: 1,800 to 2,200 feet
Mean annual precipitation: 18 to 20 inches

Mean annual air temperature: 45 to 50 degrees F
Frost-free period: 100 to 130 days
Farmland classification: Not prime farmland

Map Unit Composition

Urban land: 60 percent
Opportunity, disturbed, and similar soils: 35 percent
Minor components: 5 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Urban Land

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 8
Hydric soil rating: No

Description of Opportunity, Disturbed

Setting

Landform: Outwash plains
Landform position (three-dimensional): Tread
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Sandy and gravelly glaciofluvial deposits with minor amounts of volcanic ash and loess in the upper part

Typical profile

Ap - 0 to 7 inches: very gravelly ashy loam
A1 - 7 to 13 inches: extremely gravelly ashy loam
A2 - 13 to 19 inches: extremely gravelly ashy loam
Bw1 - 19 to 33 inches: extremely gravelly loam
Bw2 - 33 to 43 inches: extremely gravelly loam
Bq - 43 to 53 inches: extremely gravelly loamy coarse sand
BCk - 53 to 60 inches: extremely gravelly coarse sand

Properties and qualities

Slope: 0 to 3 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Well drained
Capacity of the most limiting layer to transmit water (Ksat): Moderately high (0.20 to 0.57 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Calcium carbonate, maximum content: 2 percent
Maximum salinity: Nonsaline (0.0 to 0.2 mmhos/cm)
Available water supply, 0 to 60 inches: Low (about 4.5 inches)

Interpretive groups

Land capability classification (irrigated): 2s
Land capability classification (nonirrigated): 4s

WATER WELL REPORT

STATE OF WASHINGTON

Start Card No. W57713
UNIQUE WELL I.D. # AAL625
Water Right Permit No. 7760

(1) OWNER: Name Carnhope Irrigation Dist.7 Address E. 4613 Third Ave. Spokane, WA. 99212

LOCATION OF WELL: County Spokane NE 1/4 NW 1/4 Sec 23 T. 25 N. R 43E W.M.

(2a) STREET ADDRESS OF WELL (or nearest address) E. 4903 3rd. Ave. Spokane, Wa. 99212

(3) PROPOSED USE: ☐ Domestic ☐ Industrial ☐ Municipal ☒ ☐ Irrigation ☐ Test Well ☐ Other ☐ ☐ DeWater

(4) TYPE OF WORK: Owner's number of well (if more than one) ____
Abandoned ☐ New well ☒ Method: Dug ☐ Bored ☐ Deepened ☐ Cable ☒ Driven ☐ Reconditioned ☐ Rotary ☐ Jetted ☐

(5) DIMENSIONS: Diameter of well 12 inches. Drilled 130 feet. Depth of completed well 130 ft.

(6) CONSTRUCTION DETAILS:
Casing Installed: 12" Diam. from +2 ft. to 101 ft.
Welded ☒ 10" Diam. from 125 ft. to 130 ft.
Liner installed ☐ Threaded ☐ ____" Diam. from ____ ft. to ____ ft.

Perforations: Yes ☐ No ☒
Type of perforator used ____
SIZE of perforations ____ in. by ____ in.
____ perforations from ____ ft. to ____ ft.
____ perforations from ____ ft. to ____ ft.
____ perforations from ____ ft. to ____ ft.

Screens: Yes ☒ No ☐
Manufacturer's Name Houston
Type stainless Model No. ____
Diam. 11 Slot size .100 from 100 ft. to 110 ft.
Diam. ____ Slot size .080 from 110 ft. to 115 ft.
.060 115 125

Gravel packed: Yes ☐ No ☒ Size of gravel ____
Gravel placed from ____ ft. to ____ ft.

Surface seal: Yes ☒ No ☐ To what depth? 20 ft.
Material used in seal cement
Did any strata contain unusable water? Yes ☐ No ☒
Type of water? ____ Depth of strata ____
Method of sealing strata off ____

(7) PUMP: Manufacturer's Name ____
Type: ____ H.P. ____

(8) WATER LEVELS: Land-surface elevation above mean sea level ____ ft.
Static level 60 ft. below top of well Date 2/10/95
Artesian pressure ____ lbs. per square inch Date ____
Artesian water is controlled by ____ (Cap, valve, etc.)

(9) WELL TESTS: Drawdown is amount water level is lowered below static level
Was a pump test made? Yes ☒ No ☐ If yes, by whom? Fogle
Yield: 1400 gal./min. with ____ ft. drawdown after ____ hrs.
" " " "
" " " "

Recovery data (time taken as zero when pump turned off) (water level measured from well top to water level)

Time	Water Level	Time	Water Level	Time	Water Level

Date of test ____
Bailer test ____ gal./min. with ____ ft. drawdown after ____ hrs.
Airtest ____ gal./min. with stem set at ____ ft. for ____ hrs.
Artesian flow ____ g.p.m. Date ____
Temperature of water ____ Was a chemical analysis made? Yes ☐ No ☒

(10) WELL LOG or ABANDONMENT PROCEDURE DESCRIPTION

Formation: Describe by color, character, size of material and structure, and show thickness of aquifers and the kind and nature of the material in each stratum penetrated, with at least one entry for each change of information.

MATERIAL	FROM	TO
sand, gravel, 6" minus	0	30
gravel, small boulders	30	35
gravel, 4" minus	35	45
gravel, small boulders	45	55
gravel, 6" minus	55	60
waterbearing sand, gravel, 6" minus	60	65
sandier gravel, 3" minus	65	85
gravel, 6" minus	85	110
finer gravel, more sand	110	118
sand, some gravel, mostly.060	118	130
waterbearing 60'-130'

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless

information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/19/2023 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Lists of state- and tribal (Superfund) equivalent sites

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 08/24/2023 has revealed that there are 3 HSL sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 07/10/2023 has revealed that there are 4 CSCSL sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the UST list, as provided by EDR, has revealed that there are 4 UST sites within approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

INST CONTROL: The Environmental Covenants Registry is a list of sites that have implemented institutional controls as part of the remedy. Institutional controls are administrative or legal measures used to prevent activities that may compromise the integrity of a cleanup action. They are meant to prevent exposure to contamination remaining on site. Institutional controls may include environmental covenants (also known as "deed restrictions"), zoning restrictions, public health advisories, or other administrative tools. The most common institutional control is an environmental covenant. Environmental covenants are legal recorded documents that typically limit certain uses of the property, such as: Drilling a water supply well on the property. Disturbing pavement covering contaminated areas. Residential use of the property.

A review of the INST CONTROL list, as provided by EDR, and dated 07/10/2023 has revealed that there

are 2 INST CONTROL sites within approximately 0.5 miles of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 07/10/2023 has revealed that there are 9 CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Waste Code:	D011
Waste Description:	Silver
Waste Code:	D015
Waste Description:	Toxaphene (C10 H10 Cl8, Technical Chlorinated Camphene, 67-69 Percent Chlorine)
Waste Code:	D016
Waste Description:	2,4-D (2,4-Dichlorophenoxyacetic Acid)
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D020
Waste Description:	Chlordane
Waste Code:	D023

HOME DEPOT STORE 4714 (Continued) **1005445024**

Waste Description:	O-Cresol
Waste Code:	D024
Waste Description:	M-Cresol
Waste Code:	D027
Waste Description:	1,4-Dichlorobenzene
Waste Code:	D028
Waste Description:	1,2-Dichloroethane
Waste Code:	D031
Waste Description:	Heptachlor (And Its Epoxide)
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D039
Waste Description:	Tetrachloroethylene
Waste Code:	D040
Waste Description:	Trichlorethylene
Waste Code:	D043
Waste Description:	Vinyl Chloride
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	U002
Waste Description:	2-Propanone (I) (Or) Acetone (I)
Waste Code:	U072
Waste Description:	Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene
Waste Code:	U080
Waste Description:	Methane, Dichloro- (Or) Methylene Chloride
Waste Code:	U112
Waste Description:	Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)
Waste Code:	U154
Waste Description:	Methanol (I) (Or) Methyl Alcohol (I)
Waste Code:	U159
Waste Description:	2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)
Waste Code:	U160

HOME DEPOT STORE 4714 (Continued) **1005445024**

Waste Description: 2-Butanone, Peroxide (R,T) (Or) Methyl Ethyl Ketone Peroxide (R,T)

Waste Code: U161
Waste Description: 4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-

Waste Code: U165
Waste Description: Naphthalene

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U226
Waste Description: Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U240
Waste Description: 2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D

Waste Code: U249
Waste Description: Zinc Phosphide Zn3p2, When Present At Concentrations Of 10% Or Less

Waste Code: U279
Waste Description: U279

Waste Code: U411

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110070744798

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

WALMART SUPERCENTER 5883 (Continued) **1014928304**

Waste Code:	D004
Waste Description:	Arsenic
Waste Code:	D005
Waste Description:	Barium
Waste Code:	D006
Waste Description:	Cadmium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D010
Waste Description:	Selenium
Waste Code:	D011
Waste Description:	Silver
Waste Code:	D016
Waste Description:	2,4-D (2,4-Dichlorophenoxyacetic Acid)
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D022
Waste Description:	Chloroform
Waste Code:	D024
Waste Description:	M-Cresol
Waste Code:	D025
Waste Description:	P-Cresol
Waste Code:	D026
Waste Description:	Cresol
Waste Code:	D027
Waste Description:	1,4-Dichlorobenzene
Waste Code:	D030
Waste Description:	2,4-Dinitrotoluene
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D039
Waste Description:	Tetrachloroethylene
Waste Code:	D040
Waste Description:	Trichlorethylene

WALMART SUPERCENTER 5883 (Continued) **1014928304**

Waste Code:	D043
Waste Description:	Vinyl Chloride
Waste Code:	P001
Waste Description:	2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%
Waste Code:	P075
Waste Description:	Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts
Waste Code:	U002
Waste Description:	2-Propanone (I) (Or) Acetone (I)
Waste Code:	U034
Waste Description:	Acetaldehyde, Trichloro- (Or) Chloral
Waste Code:	U035
Waste Description:	Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil
Waste Code:	U058
Waste Description:	2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide
Waste Code:	U072
Waste Description:	Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene
Waste Code:	U080
Waste Description:	Methane, Dichloro- (Or) Methylene Chloride
Waste Code:	U112
Waste Description:	Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)
Waste Code:	U122
Waste Description:	Formaldehyde
Waste Code:	U129
Waste Description:	Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane
Waste Code:	U132
Waste Description:	Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-
Waste Code:	U134
Waste Description:	Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)
Waste Code:	U150
Waste Description:	L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan
Waste Code:	U154
Waste Description:	Methanol (I) (Or) Methyl Alcohol (I)
Waste Code:	U159
Waste Description:	2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)
Waste Code:	U165

WALMART SUPERCENTER 5883 (Continued) **1014928304**

Waste Description: Naphthalene

Waste Code: U182
Waste Description: 1,3,5-Trioxane, 2,4,6-Trimethyl- (Or) Paraldehyde

Waste Code: U188
Waste Description: Phenol

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U240
Waste Description: 2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D

Waste Code: U249
Waste Description: Zinc Phosphide Zn3p2, When Present At Concentrations Of 10% Or Less

Waste Code: U279
Waste Description: U279

Waste Code: U409
Waste Description: Carbamic Acid, [1,2-Phenylenebis (Iminocarbonothioyl)]Bis-, Dimethyl Ester (Or) Thiophanate-Methyl

Waste Code: U411
Waste Description: U411

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U158
Waste Description: 4,4'-Methylenebis(2-Chloroaniline) (Or) Benzenamine, 4,4'-Methylenebis[2-Chloro-

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
Registry ID: 110012563056

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the

COSTCO WHOLESALE 670 (Continued) **1005445016**

Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS)

JAMES J WILLIAMS INC (Continued) **1007065337**

provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D008
Waste Description: Lead

Waste Code: D022
Waste Description: Chloroform

Waste Code: D029
Waste Description: 1,1-Dichloroethylene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal institutional control / engineering control registries

INST CONTROL: Institutional Control Site List

The Environmental Covenants Registry is a list of sites that have implemented institutional controls as part of the remedy. Institutional controls are administrative or legal measures used to prevent activities that may compromise the integrity of a cleanup action. They are meant to prevent exposure to contamination remaining on site. Institutional controls may include environmental covenants (also known as "deed restrictions"), zoning restrictions, public health advisories, or other administrative tools. The most common institutional control is an environmental covenant. Environmental covenants are legal recorded documents that typically limit certain uses of the property, such as: Drilling a water supply well on the property. Disturbing pavement covering contaminated areas. Residential use of the property.

PTAP: PTAP Site Listing

A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfields Sites Listing

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

LF TACOMA/PIERCE: Closed Landfill Survey
Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Longitude (West):	117.3372 - 117° 20' 13.92''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	474678.4
UTM Y (Meters):	5277808.5
Elevation:	1943 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14742608 SPOKANE NE, WA
Version Date:	2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

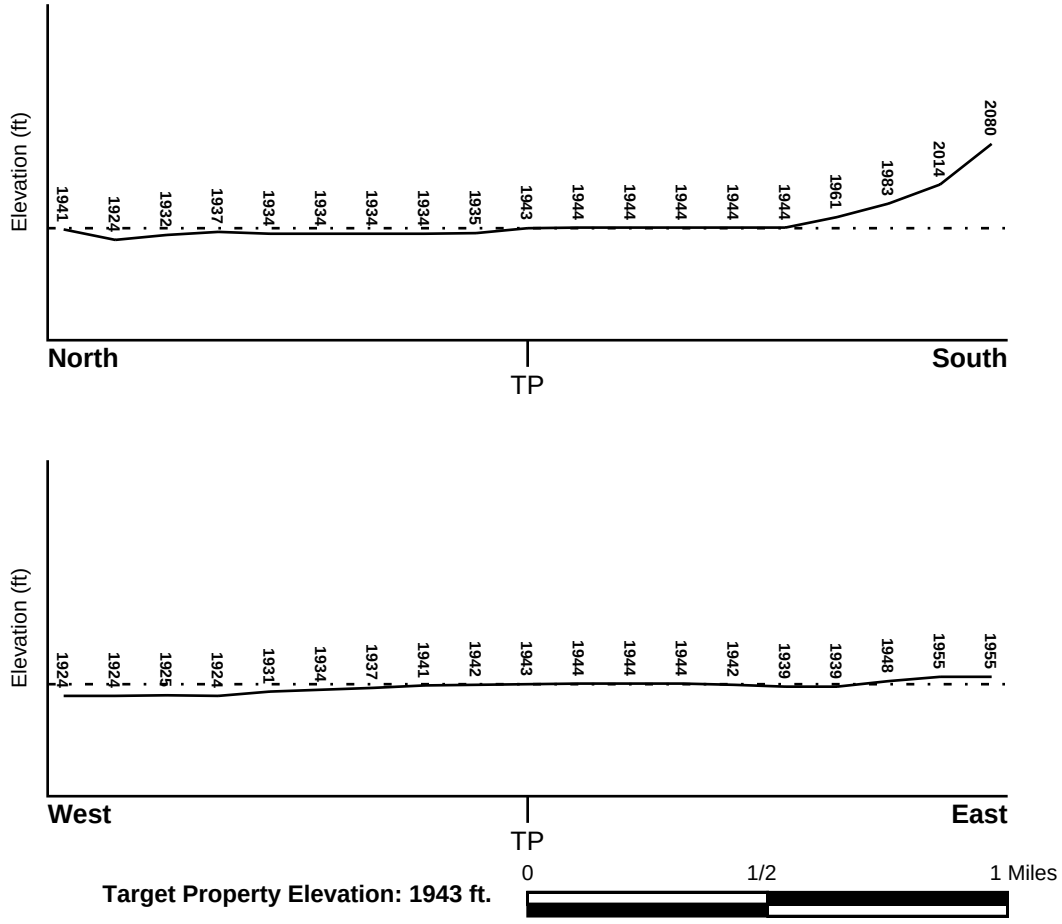

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 1943 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
53063C0564D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
53063C0562D	FEMA FIRM Flood data
53063C0561D	FEMA FIRM Flood data
53063C0563D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SPOKANE NE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile East
Site Name:	SPOKANE DRUM SITE AKA HSCI
Site EPA ID Number:	WA0001038629
Groundwater Flow Direction:	GENERALLY W
Inferred Depth to Water:	approximately 100 feet
Hydraulic Connection:	The uppermost aquifer at the site is the Spokane Valley Rathdrum Prairie aquifer that consists of sand and sediments.
Sole Source Aquifer:	A sole source aquifer is persent at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
178	1/4 - 1/2 Mile North	Not Reported
AI531	1/2 - 1 Mile ENE	E, W, Varies
1G	1/4 - 1/2 Mile North	Not Reported
2G	1/2 - 1 Mile ENE	E, W, Varies

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Precambrian	Category:	Metamorphic Rocks
System:	Precambrian		
Series:	Paragneiss and schist		
Code:	Ym *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	AVONVILLE
Soil Surface Texture:	fine gravelly - silt loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	16 inches	fine gravelly - silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 6.00 Min: 5.60
2	16 inches	25 inches	very gravelly - silt loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 2.00 Min: 0.60	Max: 7.30 Min: 6.60
3	25 inches	37 inches	very gravelly - sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 6.00 Min: 2.00	Max: 7.30 Min: 6.60
4	37 inches	60 inches	very gravelly - sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 6.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
gravelly - silt loam
sandy loam
gravelly - loam
gravelly - sandy loam
loamy coarse sand
very stony - loam
cobbly - sandy loam
silt loam
gravelly - coarse sandy loam

Surficial Soil Types:
gravelly - silt loam
sandy loam
gravelly - loam
gravelly - sandy loam
loamy coarse sand
very stony - loam
cobbly - sandy loam

	silt loam
	gravelly - coarse sandy loam
Shallow Soil Types:	very gravelly - sandy loam
	gravelly - coarse sandy loam
	fine sandy loam
	gravelly - silt loam
	silt loam
Deeper Soil Types:	extremely gravelly - coarse sand
	coarse sand
	very gravelly - loamy coarse sand
	loamy sand
	very stony - loamy coarse sand
	extremely gravelly - loamy sand
	stratified
	very cobbly - fine sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Ecology
Telephone: 360-407-6121

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells
Source: Department of Health
Telephone: 360-236-3148
Group A and B well locations.

Water Well Listing
Source: Public Utility District
Telephone: 206-779-7656
A listing of water well locations in Kitsap County.

Ecology Well Logs
Source: Department of Ecology
Telephone: 360-407-7294
Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid. Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing
Source: Department of Natural Resources
Telephone: 360-902-1450
Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Fulcrum Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 1/5/2024 at 6:37 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.
